Colorado Extended Producer Responsibility Needs Assessment

Colorado state signed House Bill 22-1355 into law in June 2022.

This will require producers of packaging to cover the cost of recycling across the state, which will include investment in new infrastructure and development of end markets for recycled materials.

As part of this process, we will be engaging with a wider range of stakeholders to understand current service provision and to access data.

We will host 2 webinars to discuss the needs of the project:

September 7th, 2023, at 12PM MDT

September 14th, 2023, at 12PM MDT

Please register by scanning the code below to receive more information on the webinars and how to participate.
